WORK EXPERIENCE

Teaching Assistant October 2016 - December 2016
Queen Mary, University of London

- Teaching assistant for the module: Algorithms and Data Structures in an Object-Orientated Framework
- Helping the lecturer in grading the student's lab work and explaining programming concepts to students

Summer Technology Analyst June 2016 - September 2016
Goldman Sachs

- Worked on creating a web application for the finance engineering business unit to monitor capacity on file systems
- Created a RESTful API to provide file mount information to the user interface
- Languages and frameworks used: Java, HTML, CSS, JavaScript, Angular, DropWizard, SVN

Software Developer (Placement) July 2015 - June 2016
Abcam

- Wrote code to fix bugs, write tests and implement new features in existing web applications
- Produced a web app which shows information of Abcam produced antibodies using the ENCODE API
- Languages and frameworks used: C# MVC, HTML, CSS, JavaScript, ColdFusion, T-SQL

EDUCATION

University of Manchester September 2017 - Present
MSc Advanced Computer Science

Queen Mary, University of London September 2013 - July 2017
BSc Computer Science with Industrial Experience

- Achieved a first class mark

Alperton Community School September 2009 - June 2013

- A Levels: ICT (A), Maths (B), Government and Politics (C)
- GCSE: 8 GCSEs (A* - C) including Mathematics and English

PROJECTS

Pixel Map

- A decentralized application which shows a pixel map powered by transactions on the Ethereum blockchain
- Used a graphics library to interact with the pixel map by zooming, dragging, hovering and clicking
- Languages and frameworks used: Solidity, JavaScript, web3.js, p5.js, jQuery, HTML, CSS, Truffle

Speech2Code IDE

- Built a Java IDE which uses speech to write compilable Java code
- Can run Java code within the application and has support for file input/output
- Languages and Frameworks Used: Java, JavaFX, Sphinx4

Image Processing

- Implemented several image processing algorithms such as image filtering, histogram equalization and thresholding
- Many other features such as undo, applying a region of interest and input/output of image files
- Languages and Frameworks Used: C++, wxWidgets

SKILLS

Java, JavaScript, Python, C++, C#, Solidity, Node.js, AngularJS, HTML, CSS, SQL, Git, Unix
